

**Holder Aerospace cofounder honors 2009 Space Technology Hall of Fame Winners at the 25<sup>th</sup> National Space Symposium in Colorado Springs, Colorado (March 25, 2009)**

Livingston Holder, Partner and co-founder of Holder Aerospace helps present the Space Technology Hall of Fame awards at the 25<sup>th</sup> National Space Symposium in Colorado Springs, Colorado. Mr. Holder is a long time supporter of the Space Foundation, its Science, Technology, Engineering, and Mathematics (STEM) youth education outreach activities and its promotion of space technologies for terrestrial use through the Space Technology Hall of Fame. He was asked to help present the awards to individuals who transformed work originally developed for space activities into products that help improve the quality of life here on Earth. The awards also increase public awareness of the benefits of space technology and are intended to encourage further innovation.
